Section 4: First-Aid Measures

Description of first aid measures

Inhalation	 IF INHALED: If breathing is difficult, remove victim to fresh air and keep at rest in a position comfortable for breathing. Give artificial respiration if victim is not breathing. If signs/symptoms continue, get medical attention.
Skin	• In case of contact with substance, immediately flush skin with running water for at least 20 minutes. If irritation develops and persists, get medical attention.
Eye	 In case of contact with substance, immediately flush eyes with running water for at least 20 minutes. If eye irritation persists: Get medical advice/attention.
Ingestion	 First aid is not expected to be necessary if material is used under ordinary conditions and as recommended.
Most impo	rtant symptoms and effects, both acute and delayed
	Refer to Section 11 - Toxicological Information.
Indication	of any immediate medical attention and special treatment needed

Notes to Physician • Immediate medical attention after exposure to this material not expected to be necessary. No special treatment indicated related to exposure to this material.

Section 5: Fire-Fighting Measures

Extinguishing media

Suitable Extinguishing Media	 Water, Carbon Dioxide, or multipurpose ABC dry chemical extinguisher.
Unsuitable Extinguishing Media	None known.
Special hazards aris	ing from the substance or mixture
Unusual Fire and Explosion Hazards	• Sawing, sanding or machining wood products can produce wood dust as a by-product. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
Hazardous Combustion Products	• Thermal –oxidative degradation, or burning, of wood can produce irritating and potentially toxic fumes and gases including carbon monoxide, aldehydes, and organic acids.
Advice for firefighter	′S
	 Wear positive pressure self-contained breathing apparatus (SCBA). Structural firefighters' protective clothing will only provide limited protection.

Section 6 - Accidental Release Measures

Personal precautions, protective equipment and emergency procedures

Personal Precautions	 Ventilate enclosed areas. Do not walk through spilled material. Wear appropriate personal protective equipment, avoid direct contact.
Emergency Procedures	 Contain spill and monitor for excessive dust accumulation. Avoid unnecessary personnel and equipment traffic in the spill area.

Environmental precautions

• No special environmental precautions necessary.

Methods and material for containment and cleaning up

Containment/Clean-up Measures	Avoid generating dust. Use clean nonsparking tools to collect material.
	explosive mixture if they are released into the atmosphere in sufficient concentration.

Section 7 - Handling and Storage

Precautions for safe handling

Handling • Use only with adequate ventilation. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Provide adequate precautions, such as electrical grounding and bonding, or inert atmospheres. Wet down, or use an approved exhaust system, to control wood dust generated by sawing, sanding, or machining to reduce the likelihood of ignition or dispersion of dust into the air. Wear appropriate personal protective equipment, avoid direct contact. Do not breathe dust. Avoid contact with skin, eyes, and clothing. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco.

Conditions for safe storage, including any incompatibilities

Storage • Ensure that product is stored properly, supported adequately and protected from direct contact with the ground. Wood products are combustible and should not be subjected to temperatures exceeding the auto ignition temperature. Store in a cool, dry, well-ventilated place.

Section 8 - Exposure Controls/Personal Protection

Control parameters

Exposure Limits/Guidelines					
	Result	ACGIH	NIOSH	OSHA	
STI	STELs	Not established	Not established	2 ppm STEL (see 29 CFR 1910.1048)	
(50-00-0)	TWAs	Not established	0.016 ppm TWA	0.75 ppm TWA	
	Ceilings	0.3 ppm Ceiling	0.1 ppm Ceiling (15 min)	Not established	
Wood dust as Particulates not otherwise classified (PNOC)	TWAs	10 mg/m3 TWA (inhalable particles, recommended); 3 mg/m3 TWA (respirable particles, recommended) as Particulates not otherwise classified (PNOC) 0.5 mg/m3 TWA (inhalable fraction) as Wood dust, western red cedar 1 mg/m3 TWA (inhalable fraction) as Wood dusts (all other wood dusts)	1 mg/m3 TWA as Wood dust, all soft and hard woods	15 mg/m3 TWA (total dust); 5 mg/m3 TWA (respirable fraction) as Particulates not otherwise classified (PNOC)	

Exposure controls

Engineering Measures/Controls	• Ensure that dust handling systems (such as exhaust ducts, dust collectors, vessels and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is not leakage from the equipment). It is recommended that dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion supression system or an oxygen-deficient environment. Use only appropriately classified electrical equipment.
Personal Protective E	quipment
Respiratory	• For limited exposure use an N95 dust mask. For prolonged exposure use an air-purifying respirator with high efficiency particulate air (HEPA) filters. Follow the OSHA respirator regulations found in 29 CFR 1910.134. Use a NIOSH/MSHA approved respirator if exposure limits are exceeded or symptoms are experienced.
Eye/Face	Wear safety goggles.
Skin/Body	 Wear appropriate gloves. Wear long sleeves and/or protective coveralls.
Environmental Exposure Controls	 Follow best practice for site management and disposal of waste.
Key to abbreviations	

ACGIH = American Conference of Governmental Industrial Hygiene NIOSH = National Institute of Occupational Safety and Health OSHA = Occupational Safety and Health Administration

STEL = Short Term Exposure Limits are based on 15-minute exposures TWA = Time-Weighted Averages are based on 8h/day, 40h/week exposures

Section 9 - Physical and Chemical Properties

Information on Physical and Chemical Properties

Material Description			
Physical Form	Solid	Appearance/Description	Solid. Color and odor dependent upon wood species.
Color	Dependent upon species.	Odor	Dependent upon wood species.
Odor Threshold	No data available		
General Properties			
Boiling Point	No data available	Melting Point	No data available
Decomposition Temperature	No data available	pН	No data available
Specific Gravity/Relative Density	< 1 Water=1	Water Solubility	No data available
Viscosity	No data available		
Volatility			
Vapor Pressure	No data available	Vapor Density	No data available
Evaporation Rate	No data available		
Flammability			
Flash Point	No data available	UEL	No data available
LEL	No data available	Auto ignition	400 to 500 F(204.4444 to 260 C) for wood
Flammability (solid, gas)	No data available		
Environmental			
Octanol/Water Partition coefficient	No data available		

Section 10: Stability and Reactivity

Reactivity

• No dangerous reaction known under conditions of normal use.

Chemical stability

• Stable under normal temperatures and pressures.

Possibility of hazardous reactions

• Hazardous polymerization not indicated.

Conditions to avoid

• Avoid ignition sources where dust is produced. Wood dust generated from sawing, sanding or machining is extremely combustible.

Incompatible materials

• Oxidizing agents and dry oils.

Hazardous decomposition products

• Thermal-oxidative degradation, or burning, of wood can produce irritating and potentially toxic fumes and gases including carbon monoxide, aldehydes, organic acids and hazardous particles.

Section 11 - Toxicological Information

Information on toxicological effects

GHS Properties	Classification
Acute toxicity	OSHA HCS 2012•No data available UN GHS•No data available

Serious eye damage/Irritation	OSHA HCS 2012•No data available UN GHS•No data available

Potential Health Effects

Inhalation

- Acute (Immediate) • Exposure to dust may cause irritation. Processes such as cutting, grinding, crushing, or impact may result in generation of excessive amounts of airborne dusts in the workplace. Nuisance dust may affect the lungs but reactions are typically reversible.
- Chronic
 May cause allergy or asthma symptoms or breathing difficulties if inhaled. A large number of studies have demonstrated that occupational exposure to wood dust causes both statistically significant and nonsignificant increases in respiratory symptoms. These symptoms range from irritation to bleeding,

wheezing, sinusitis, and prolonged colds. In addition, chronic wood dust exposure causes mucociliary stasis (i.e., the absence of effective clearance) in the nose and, in some workers, also causes changes in the nasal mucosa.

Skin Acute Exposure to dust may cause mechanical irritation. May cause skin sensitization. Symptoms include (Immediate) redness, and skin rash. No data available. Chronic (Delayed) Eye Acute Exposure to dust may cause mechanical irritation. Excessive concentrations of nuisance dust in the (Immediate) workplace may reduce visibility and may cause unpleasant deposits in eyes. Chronic No data available. (Delayed) Ingestion Acute Excessive concentrations of nuisance dust in the workplace may cause mechanical irritation to (Immediate) mucous membranes. Chronic No data available (Delayed) Carcinogenic • Repeated and prolonged exposure may cause cancer. IARC and NTP classify wood dust as a Effects carcinogen. This classification is based on the increased occurrence of adenocarcinomas of the nasal cavities and paranasal sinuses associated with exposure to wood dust. The evaluation noted insufficient evidence to associate cancers of the oropharynx, hypopharynx, lung, lymphatic and hematopoietic systems, stomach, colon or rectum with exposure to wood dust.

Carcinogenic Effects				
	CAS	OSHA	IARC	NTP
Formaldehyde	50-00-0	Specifically Regulated Carcinogen	Group 1-Carcinogenic	Known Human Carcinogen
Wood dust as Wood dust, all soft and hard woods	NDA	Not Listed	Group 1-Carcinogenic	Known Human Carcinogen

Section 12 - Ecological Information
