# TAFIPAN<sup>®</sup>

# PARTICLEBOARDS SAFETY DATA SHEET

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATIONS	
Common name : TAFIPAN®	
Description : Phase 2 standard CARB particles	oards.
CAS : N/A	
Material uses : Furniture, construction, laminat	on industry.
Synonyms: Particleboard agglomerated paneling	ng, rough paneling.
SUPPLIER / MANUFACTURER :	IN CASE OF EMERGENCY :
Tafisa Canada	(819) 583-3014 (ext 333) - Security 24hrs
4660, Villeneuve	(819) 583 2930 – Front desk 8AM to 17PM
Lac-Megantic	Or call your local Emergency Health Services Center.
Quebec, Canada G6B 2C3	
Phone : (819) 583-2930	

# 2. HAZARDS IDENTIFICATIONS

#### Physical state : Solid

**Warning**: In current form, product poses no hazard. Hazards occur during transformation and shaping of the panels such as sanding and sawing operations. When sanding or sawing, wood dusts produced may cause allergic reactions and irritate respiratory tracts, skin and eyes. Avoid breathing dusts. Use personal protection equipment (PPE) as well as appropriate respiratory protection equipment for these types of tasks. Wood dusts are also known to cause industrial asthma in certain people.

Routes of entry of fine particles during transformation: Inhalation, eyes and skin. Absorption through ingestion is not likely.	
Potential acute health effects:	
Eyes	Fine particles can cause mechanical irritation.
Skin	In case of skin sensitivity, contact with fine particles can cause light irritations such as redness and itching.
Inhalation	In case of respiratory sensitivity, fine particles may cause respiratory tract irritations. Dusts can cause upper respiratory tract, dryness to the nose, throat or trachea. Cases of coughing, wheezing, sneezing, sinusitis and prolonged colds were equally reported and linked to the presence of wood dusts.
Ingestion	Unlikely. In case of a large quantity ingestion, product may cause gastro-intestinal obstructions.

Chronic effects and Health effects of ingredients: See section #11 Toxicological information.

3. COMPOSITION AND INFORMATION ON INGREDIENTS		
Name	CAS	Concentration %
Wood (Woody fibres)	None	60 – 100
Formaldehyde	50-00-0	< 0.1
4,4'-Diphenylmethane diisocyanate	101-68-8	0 - 15
Ammonium nitrate	6484-52-2	0,1 - 15

Note :

1. This product contains ingredients known to be hazardous in concentrations lower than 0.1%, such as Formaldehyde (freed) (CAS: 50-00-0). Formaldehyde emissions conform to the CARB ATCM 93120 phase 2 law.

<sup>2.</sup> Product contains resins that are polymerized during fabrication.

4. FIRST AID MEASURES		
Eye contact	Immediately flush eyes with running water for at least 20 to 30 minutes maintaining eyelids open. Be careful not to contaminate non affected areas. Immediately consult a doctor.	
Skin contact	Immediately wash affected area with soapy water and rinse abundantly with running water. Obtain immediate medical care if irritation symptoms appear.	
Inhalation	If irritation symptoms appear after dust inhalation, remove victim to fresh air. Monitor vital signs and consult a doctor. If victim is no longer breathing, administer cardio-pulmonary-resuscitation (CPR). Do not use mouth-to-mouth technique if the victims face, mouth or respiratory tracts are contaminated with the substance. Administer CPR with a pocket mask equipped with a safety valve or any other appropriate medical breathing equipment. Contact emergency services immediately.	
Ingestion	In case of ingestion of large quantities, DO NOT induce vomiting. Immediately consult a doctor.	

Notice to Physician:

For cases in which a victim must consult a doctor or if emergency services are required on scene for an intervention or medical transport, provide a copy of this SDS to the victim if health condition allows it, to person accompanying victim or to emergency responder in order for the information to readily be available in the emergency room or to doctors.

5. FIRE FIGHTING MEASURES		
Flammability of the product	Product base is wood fibres. Product is combustible. It will burn if involved in a fire. Wood dusts may form an explosive mix with air in the right circumstances and concentrations.	
Lower limit of explosivity	Class A - combustible material, 40 grams per m <sup>3</sup> of air (Wood dusts). Class C - ASTM E84 (Panels).	
Upper limit of explosivity	Not applicable	
Auto-ignition temperature	Variable, from 200°C to 280 °C (392°F to 536°F). Auto-ignition temperatures are hard to	

# PARTICLEBOARDS SAFETY DATA SHEET

	determine because of the large range of products and factors involved in the fabrication.
Flash point	Not applicable
Products of combustion	Carbon Dioxide (CO <sub>2</sub> ), Carbon Monoxide (CO), Ammonia (NH <sub>3</sub> ), aliphatic aldehydes, Rosin acids, Terpenes.
Fire hazards in presence of	Not applicable
various substances	
Fire fighting media and	Firefighting method adapted to products immediate surroundings such as water, dry chemical
instructions	powder, Carbon Dioxide (CO <sub>2</sub> ), sand etc.
Special note	Use water or carbonated gasses to fight fire. Class A foam may reduce fire possibilities by easing water penetration. Wear respiratory protection apparatus with formaldehyde and organic vapour approved cartridges.

# 6. ACCIDENTAL RELEASE MEASURES

Product poses no accidental spill hazards. Personal precautions: Not applicable. Environmental precautions: Not applicable. Methods for cleaning up: Not applicable.

7.	HANDING AND STORAGE	
Handing	)	Handle according to task performed with product. Apply professional and personal hygiene practices such as washing hands before eating. Ban eating, drinking and smoking in contaminated areas. Use workplace safety procedures in order to prevent accidents.
Storage		It is recommended to store product in an area where humidity is reasonable and where temperature corresponds to the room temperature where the product will be used.

8. EXPOSURE CONTROLS, PERSONAL PROTECTIONS		
Engineering controls	Ensure proper ventilation and local exhaust in order to maintain contaminant concentrations below exposure limits. It is important to consider the nature and hazards (explosiveness) of wood dusts when selecting mechanical control systems.	
Eyes	Wear safety glasses with side shields.	
Respiratory	In normal handling, respiratory protection is not necessary. In case of dust emanation, wear a dust mask or cartridge mask for fine particle.	
Hands	Work gloves in order to prevent cuts, splinters and abrasions.	
Skin	Standard work clothing.	
Other	Provide an emergency eye wash and quick drench shower in the immediate work area.	

9. PHYSICAL AND CHEMICAL PROPERTIES		
Molecular mass	Not available	
Physical status	Solid	
Color	Pale to dark beige color depending on type of wood.	
Odour	Varies according to type of wood and indirectly proportionate to age of panel.	
Odour threshold	Not available	
Humidity	4% to 5 %	
Density	Varies according to type of wood and humidity degree.	
Freezing point	Not available	
Boiling point	Not available	
Vapour tension	Not available	
Density of vapour	Not available	
Solubility in water with saturation	Insoluble	
Specific gravity @ 4°C (Water = 1)	Varies according to type of wood and humidity degree (generally <1).	
Rate of evaporation	Not applicable	
Volatility	Not applicable	
Evaporation rate	Not applicable	
рН	Not applicable	

10. STABILITY AND REACTIVITY	
Stability and reactivity	Stable. Temperature may increase the amount of Formaldehyde emissions emitted from the panels particles.
Incompatibility	Oxidizing agents, open flames and elevated temperatures. Excessive humidity and contact with water may deform product.

# **TAFIPAN**<sup>®</sup>PARTICLEBOARDS<br/>SAFETY DATA SHEET

# PARTICLEBOARDS

Hazardous decomposition products	Thermal decomposition products, such as Carbon Dioxide (CO <sub>2</sub> ), Carbon Monoxide (CO), Ammonia (NH <sub>3</sub> ), Aliphatic Aldehydes, Rosin acids, Terpenes, Polycyclic aromatic hydrocarbons and Organic acids.
Reactivity conditions	High temperatures, high humidity, low air exchange. In case of wood dusts, avoid contacts with oxidizing agents and drying oils. Avoid open flames. Product may burn in temperatures exceeding 200°C. Dusts may form an explosive mix with air in the right circumstances and concentrations.
Hazardous polymerizations	Will not occur.

# 11. TOXICOLOGICAL INFORMATION

## United States regulations:

### California proposition 65 requirements:

**Warning:** Piercing, sawing, sanding or shaping wood products creates wood dusts, a substance recognized for causing cancer according to the state of California. Avoid inhaling wood dusts or use a dust mask or other personal protection measures.

### Occupational Safety and Health Administration:

Wood products are not considered dangerous merchandise according to mentioned criteria in the Hazard Communication Standard of OSHA 29 CFR 1910.1200. However, formaldehyde emissions and wood dusts produced by sawing, sanding or shaping of the panels may be hazardous. This product contains formaldehyde.

### **Department of Housing and Urban Development:**

# TAFIPAN

# PARTICLEBOARDS SAFETY DATA SHEET

The 24 CFR 3280 regulations by the United-States Department of Housing and Urban Development HUD define the emission standards and emits a certification emitted by a third party pour particle panels and Formaldehyde emissions emitted from MDF panels.
